Interface Design (IDD) Description_Arrowhead_Zwave_System_Demonstrator_FibroWallPlugServices

Abstract

This document defines the template for the Interface Design Description of Arrowhead compliant Interfaces.

An Interface Design Description provides a detailed description of how the service is implemented/realized by using the Communication Profile and the chosen technologies.

All Arrowhead Interface Designs should be specified using this template and stored on a common repository (available on the SVN server), in order to document and formalize the pilot demonstrators and the common Arrowhead framework.

ARTEMIS Innovation Pilot Project: Arrowhead
THEME [SP1-JTI-ARTEMIS-2012-AIPP4 SP1-JTI-ARTEMIS-2012-AIPP6]
[Production and Energy System Automation Intelligent-Built environment and urban infrastructure for sustainable and friendly cities]

5.1. Amendments 4
5.2. Quality Assurance 4

1. Interface Design Description Overview

This document describes the services provided by Thermostat Valve with REST interface. This interface uses HTTPs.

Service description	Path
Switch-plug-state	

Communication Profile	Path
REST-JSON-TLS	

2. Interfaces

The base URL for the request is: https://<host>:<port>/zwave/plugs/{id}

Function	URL subpath	Method	Input	Output	Description
SwitchPlug	"/switch-plug-state"	POST	State ServiceType DeviceType	CREATED, BAD_REQUEST	Switch the Plug State ON (255) or OFF (0) store the response Plug device manager

3. Information Model

Example:

Request:

```
  {
"state" : 0,
 "serviceType" : "switch-plug-state",
 "deviceType" : "Plug"
  }
```

Response:
The Plug is switched OFF

4. Revision history

4.1. Amendments

No.	Date	Version	Subject of Amendments	Author
1	2021-01-6	0.1	First Draft	Salman Javed
